

InziderX.io

InziderX is a decentralized spot leverage OTC market where you can exchange the top 20 digital assets privately and without verification. Transactions are done in between anonyms insiders, wallet to wallet using Atomic Swap. Liquidity is provided by a relay system based on the Lightning Network technology.

User friendly, the InziderX terminal is devoted to actives and algorithms traders looking for leverage and quality execution. Our platform will provide the tools to help them fully deploy their strategies with complex order types, Pro-trading chart package and advances API commands.

Characteristics

Decentralized Exchange

The technology of our exchange is wallet based - Dapp. It's secure by design.

Lightning Network

By including the liquidity of the larger centralizes exchanges and other big players through the Lightning Network, we get the best of both worlds.

The security of decentralization and the liquidity of centralization.

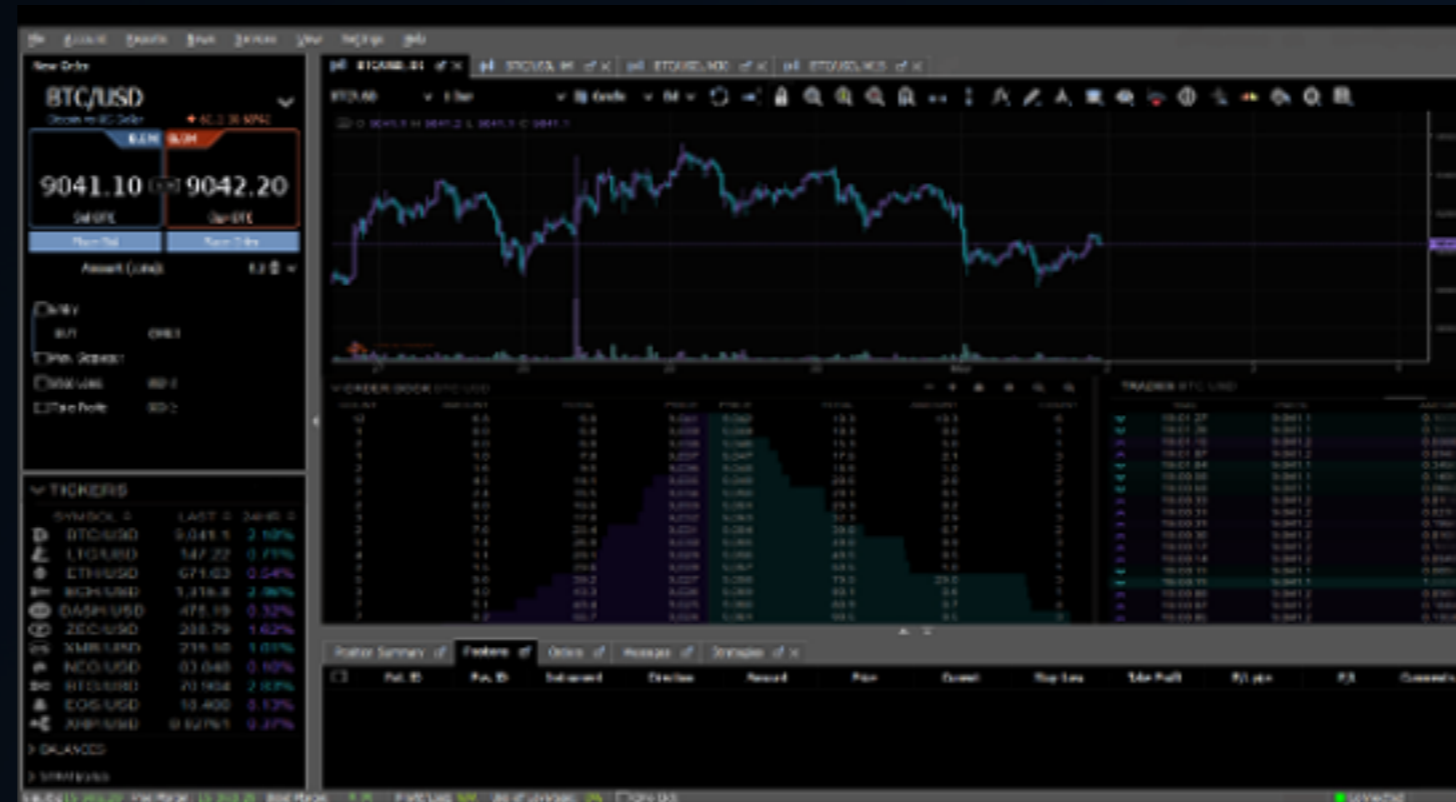

Advance Trading Tools

Our platform focus is on the active and algorithm trading.

By giving access complexes orders types, Pro-trading chart package and advances API commands.
